The programme covers the following subject areas:

European Union.

You will learn about the institutional framework of the EU as well as its mechanisms. Particular attention will be paid to the areas relevant to project management.

Project management.

You will learn to plan the project proposal from the viewpoint of an evaluator. At the same time, our tailor-made IT courses provide support in using modern project management tools.

Soft skills. Networking.

Work on European projects is virtual, requiring advanced interpersonal skills, and especially leadership skills. Our experts will train you to apply the intercultural management methods upon which the success of a project often depends. Our wide-ranging network is also hugely beneficial when it comes to establishing the project consortium, and provides access to national and international sources of funding. Moreover, an excursion to Brussels offers the opportunity to make your own contacts with the European Commission.
