

## VPN connection with MAC (OSX)

### General:

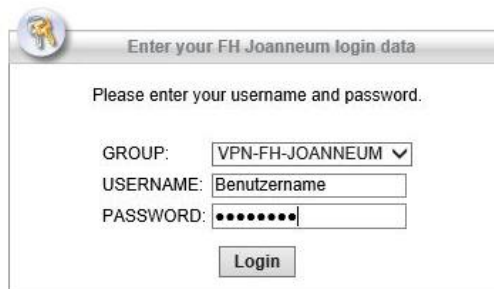

You can access FH resources (network drives, actions, SAP,...) from external networks with the CiscoAnyConnect Secure Mobility Client.

### Configure VPN connection:

1.) You can get the vpn client from the following page:

<https://vpn.fh-joanneum.at>

2.) Enter your FH user credentials and then click on „Login“

Enter your FH Joanneum login data

Please enter your username and password.

GROUP: VPN-FH-JOANNEUM ▾

USERNAME: Benutzername

PASSWORD: ●●●●●●

Login

3.) Setup tries to install the Cisco software on your computer

- 4.) If the automatic installation fails, you can get the client software from the download link as shown in the screenshot. Click on „AnyConnect VPN“

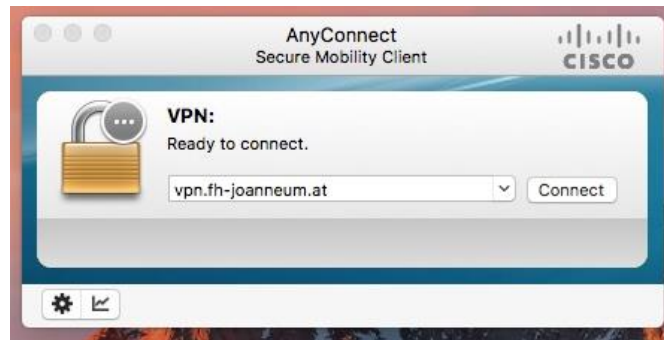

- 5.) Wait until the download completes

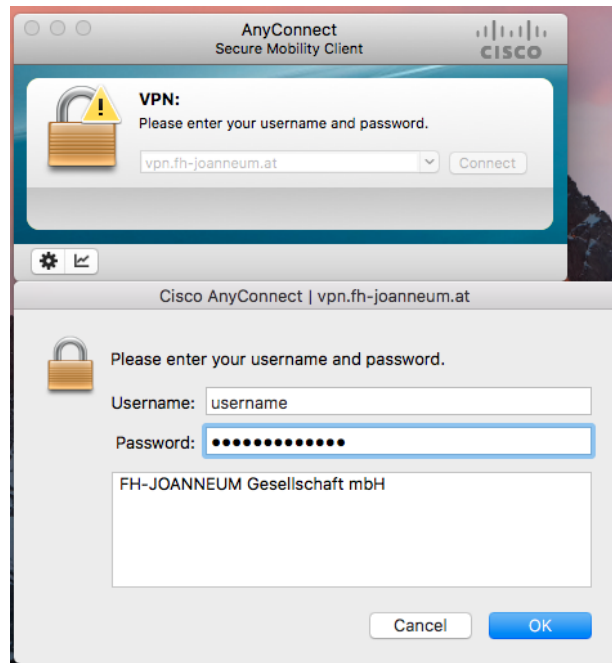

- 6.) To launch the VPN software, open the Cisco Folder in the Finder and click on „Cisco AnyConnect Secure Mobility Client“

Location	Name	Date	Size	Type
iCloud Drive	Calendar	2 Nov 2016, 09:05	21,7 MB	Applicat
Applications	Chess	31 Jul 2016, 05:50	8,7 MB	Applicat
Desktop	Cisco	12 Aug 2016, 20:15	--	Folder
Documents	Cisco AnyConnect...cure Mobility Client	7 Nov 2016, 15:30	2,2 MB	Applicat
Downloads	Uninstall AnyConnect	7 Nov 2016, 15:30	100 KB	Applicat
	Contacts	2 Nov 2016, 09:05	19,9 MB	Applicat

7.) Start AnyConnect, enter the name of the vpn service and then click "Connect"

8.) Log in with you FH user credentials

9.) The icon in the taskbar shows that you are now successfully connected to the FH network
